

**PRESS RELEASE 18**

## The first organisations receiving The LEARNing Workplaces Certification is now a reality!

AT&S Advanced Technologies and Solutions, an Austria-based company, proudly announces its pioneering achievement as the first organization worldwide to receive the esteemed "Learning Workplace" certification. This prestigious recognition was bestowed upon AT&S by the LEARN project, which has revolutionized the company's approach to learning and talent management.

Verena Tretter, Specialist corp. CoE Talent Management – Learning & Training, Human Resources Corporate at AT&S, expressed her excitement about the project's impact on the company: "The LEARN project has created an awareness of our own learning behavior, and we have received a toolbox full of (learning) tools. As CoE Talent Management, we are very proud to be the first organizational unit within AT&S to receive the 'learning workplace' certification. AT&S is also the first organization globally to achieve this remarkable certification."

Moving to Greece now, "Pinios Brewery" proudly stands at the forefront of innovation as the first microbrewery in Larissa to participate in the transformative "LEARN" project. This pioneering endeavor has ignited the brewery's passion for growth, driving them to enhance their learning-working environment while elevating the quality of their craft beers. Pinios Brewery takes great pride in its commitment to excellence. Their beers are meticulously crafted using top-quality, carefully selected raw materials and brewed through a slow, traditional, and completely natural process, spanning an entire month. The result is their flagship product, LoLa Fresh Beer, a delicious Pilsner boasting a malty taste, herbal and spicy aromas, and a delightful slightly bitter aftertaste.

Elina Mina, Marketing & Networking Manager at Pinios Brewery, expressed her enthusiasm for the "LEARN" project's impact on the brewery: "Our participation in the 'LEARN' project sparked our interest, motivated us to keep growing, and improved the learning-working environment. We found the execution of activities aligned with the Building Blocks and the training on all six transversal skills modules to be highly enjoyable. Moreover, the superb participation of other project participants proved to be immensely beneficial."
